PROFILE

Multidisciplinary creative with 6+ years across 3D animation, character art, graphic design, and AI-driven content systems. I worked on One Piece, Dragon Ball Super, and Saint Seiya at Toei Animation under Japanese CG supervisors. Now applying that visual-first thinking to AI design workflows, video editing, brand content, and scalable copy systems — deploying AI tools thoughtfully across design, writing, and production pipelines. I also run a YouTube channel as a creative hobby and created creative workflows to streamline my faceless channel.
